# Profile Avatar for M2 Documentation

It is very important to take care of customers who choose your store for online-shopping, so you need to make something for their convenience on your website. You can update your store by adding the extraordinary functionality, interesting and fun features or some design solutions. Then The Profile Avatar Extension definitely will be your solution.

The Profile Avatar extension makes customers accounts more interesting by allowing photos to be uploaded for personalization. Customer accounts will show an avatar for each customer which the customers get to customize.

After installing the extension, the customer profile photo and uploading tools will be injected on the customer's account page on the frontend. It allows users to upload an avatar and add personal details to personalize their profiles.

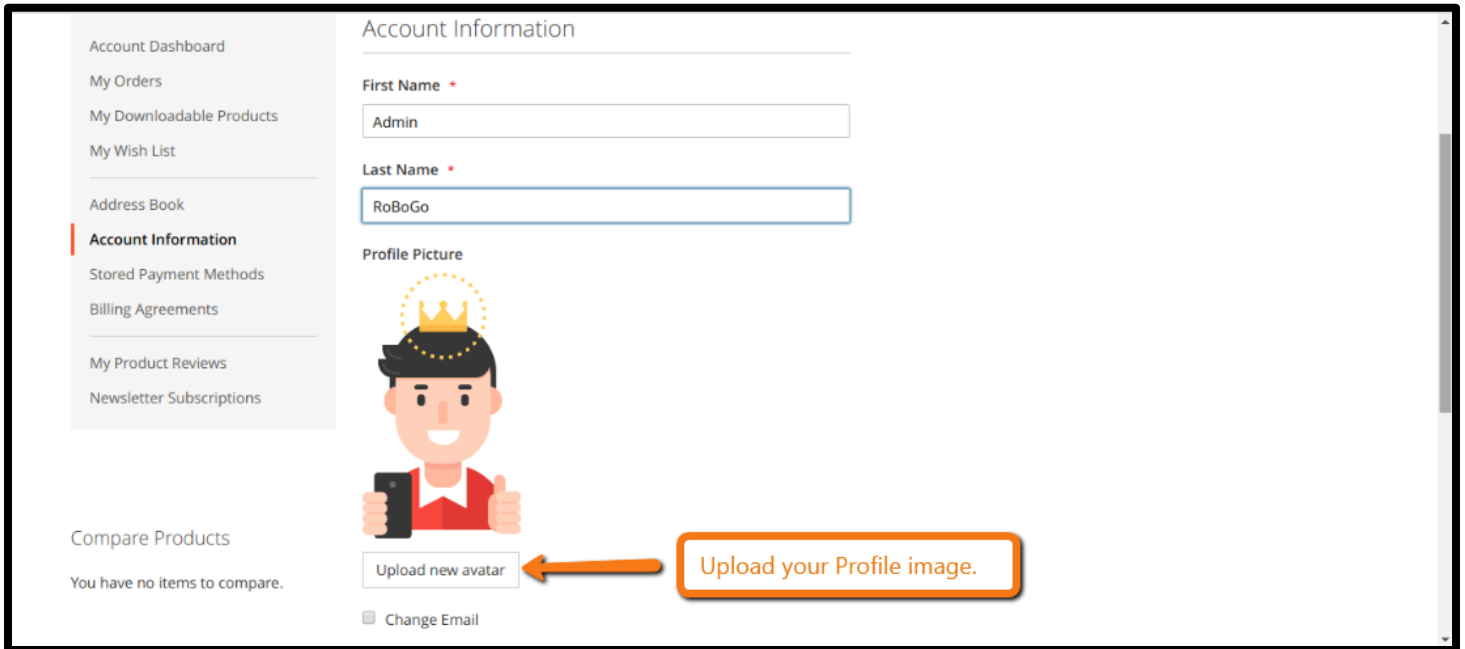

## 1. Key Features:

- a – Create Robust User Profiles.
- b - Display User Avatar.

c – Profiles for product Detail Page comments and review sections.

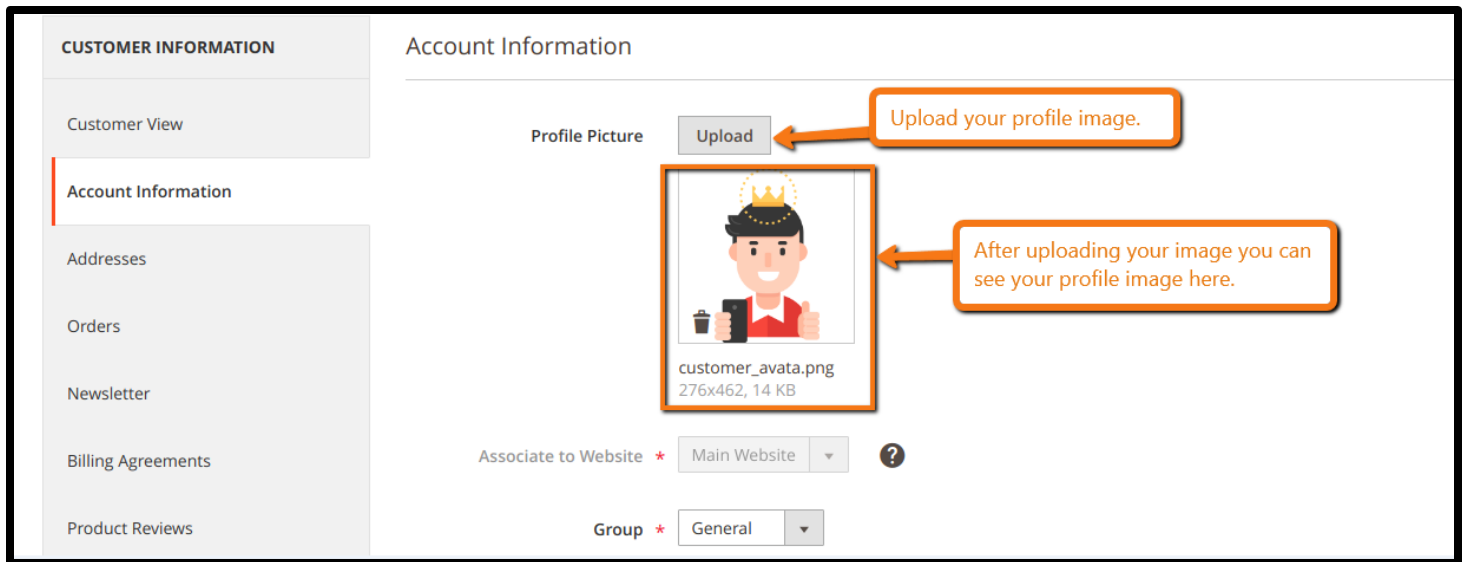

## Merchant Benefits :

User profiles Magento module provides an instant medium of communication to store owners, so that they speed up their interaction with customers in a very interactive way. Following are the benefits you can enjoy after installing it on your e-store. By allowing users to create profiles, you can engage more visitors and turn them to your loyal customers.

## Customer Benefits :

This module is equally beneficial for merchants and customers, as it connects them to the store admin (you) for quick interaction. It bridges the communication gap between you and the visitors. Users can avail the following benefits. Users can add personal details, an image and email address to their profiles and use them publicly.

## Features :
