Show the location of your Business/ Office/ Workplace with Free Magento 2 Google Map Contact Us.

The default Magento 2 'Contact us' page consists of three forms to fill in. With the Google Map extension, you can make this page more visually appealing by adding the map to it. Also, you provide your customers with the information about the store address to improve their

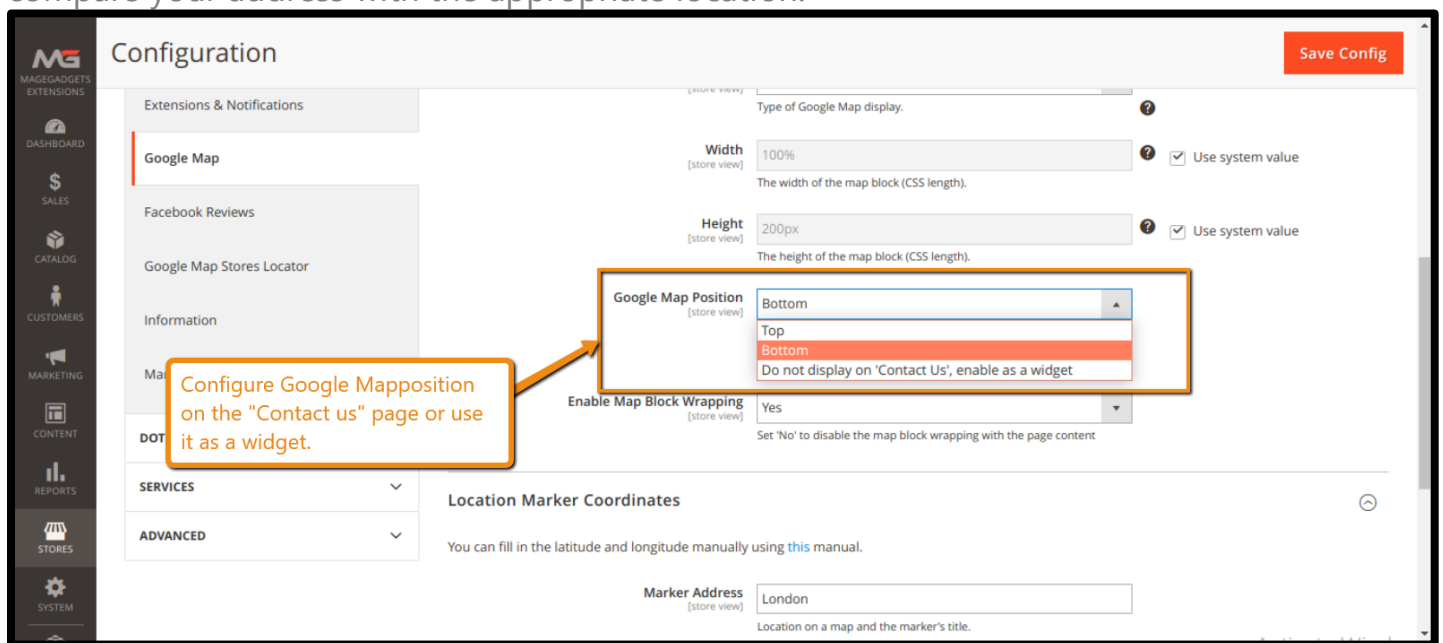

shopping experience and gain trust. On top of that, the module is absolutely free and a map can be added to any CMS-page.

Adjust Google Map size and position :

Google Maps Magento extension allows you to select the position of the navigation block on the page. Place the map above or below the 'Contact us' form. Also, you can define the block's width and height to help a map fit your content.

Automatically fill in the coordinates :

When the address is set, you can either fill the coordinates automatically with the corresponding button or enter them manually. The extension utilizes Google Maps API to compare your address with the appropriate location.

Define map appearance and zoom:

With the extension, you can configure the appearance of the Magento 2 Google map. Choose between the satellite, roadmap, and hybrid options to provide your customers with the most intuitive information about your business location.
