

Stock Status

(Magento 1.7.x to 1.9.x)

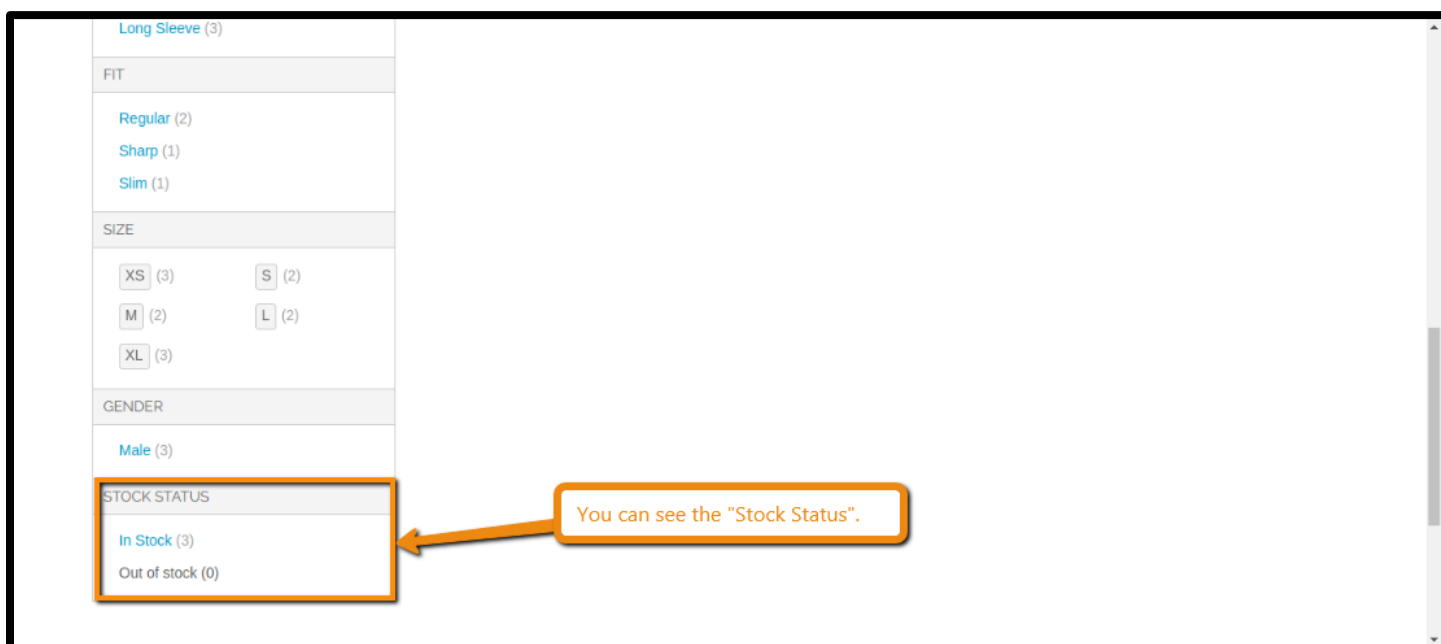

Magento Extension User Guide

Official extension page: [Stock status - MageGadgets Extensions](#)

Stock Status for M1 Documentation

This extension adds a new filter in the layered navigation with 2 option i.e in stock and out of stock. This way the user can filter only in stock products or out of stock products whatever they wants if your shop do have outof stock product this extension can be usefull for you.

1. Key Features:

- a – See the stock list .
- b - Accurate and reliable.

2. All settings are available admin:

Go to Admin -> Store -> Setting -> Configuration > Magegadgets> Stock Status

This is a demo store. Any orders placed through this store will not be honored or fulfilled.

Layered Nav Stock Filter Save Config

Settings

Enabled	Yes	[STORE VIEW]
<small>▲ Your store does not display out of stock products so enabling this extension is useless. You have to show the out of stock products for this extension to make sense. You can do that from System->Configuration->Inventory->Stock Options. Set the field "Display Out of Stock Products" to "Yes"</small>		
Enabled for Catalog pages	Yes	[STORE VIEW]
Enabled for Search pages	No	[STORE VIEW]
URL param name	in-stock	[STORE VIEW]
Filter label	Stock Status	[STORE VIEW]

You can modify like "Enabled" and "Disabled".

Enabled for Catalog pages : This enables/disables the stock filter for category pages.

Enabled for Search pages : This enables/disables the stock filter for quick search and advanced search results.

URL param name: When filtering by stock status or any other filter a new parameter is added to the url. In this case in-stock=1|0. From here you can change that parameter s name in case in-stock is conflicting with an other attribute.

Filter label : You can change from here, and translate the label of the filter.
