

Buy Now

User Guide

Magento Compatibility: CE 2.1, 2.2, 2.3

[Official extension page: Buy Now - MageGadgets Extensions](#)

[Buy Now for M2 Documentation](#)

Introduction: The extension creates a single click "Buy Now" button on your Magento store to speed up the checkout process, increase conversion rate, one-click to the checkout page. It will make customer able to checkout as quickly as possible, especially for returning customers who want to buy a particular product.

By default, Magento has 2 options for what happens after customers click on the "add to cart" button, stay on the product page or redirect to the cart page. Both of them will slow down the checkout process and decrease the conversion rate. A button which adds product to cart and redirects a customer to the checkout page with one click will solve this problem.

Key Features

- Create a button to increase checkout speed, the button text is editable in the backend.
- Multi store support.
- Show the button on the product page.
- Show the button on product list pages (category page, search page, advanced search page).
- Show the button on product widgets (top-rated, best sellers, new arrival ... etc).
- Show the button on related product list.
- No extra coding needed.
- Removes complexity
